

leafdown: Interactive Multi-Layer Maps in Shiny Apps

Andreas Hofheinz - R Studio Conference 2022

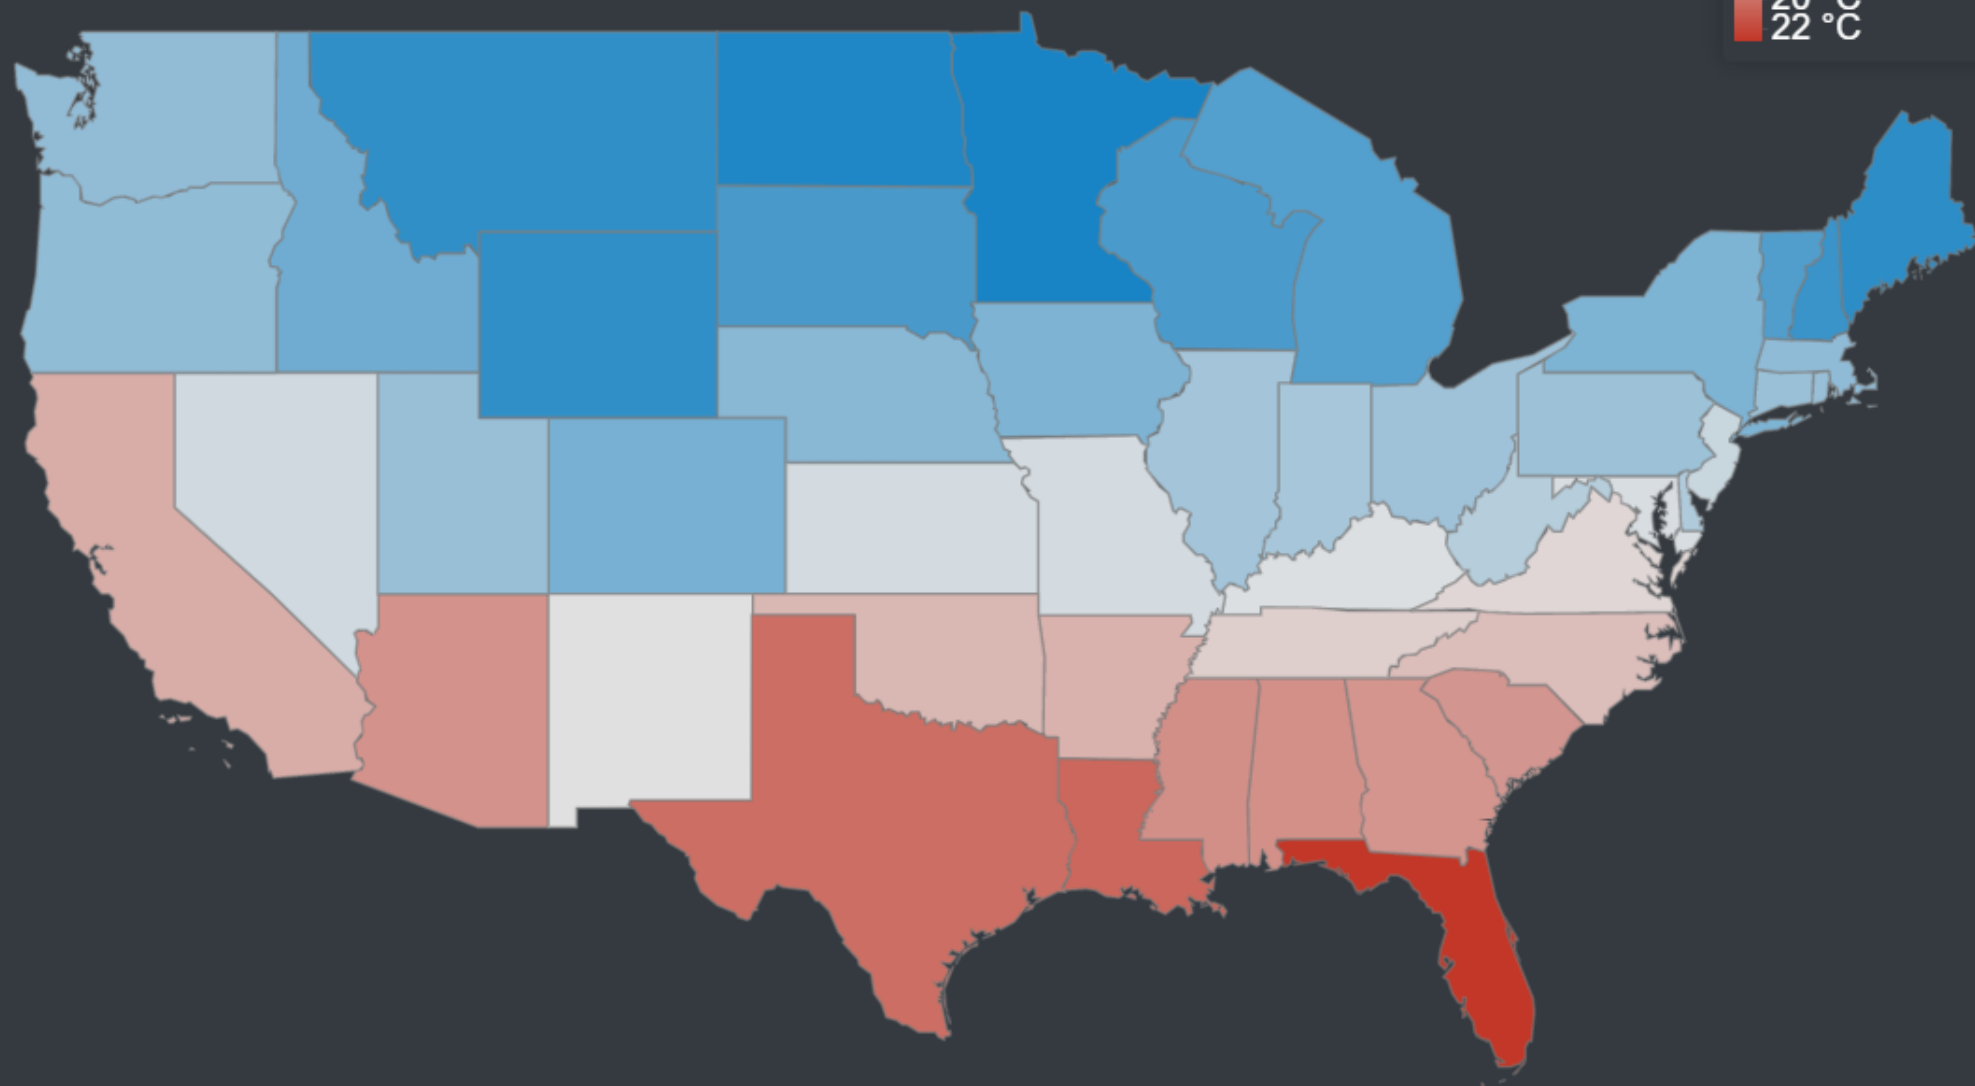

Meteostat Weather's Record Keeper¹:

- Monthly measurements from 2,335 weather stations in the US (e.g., average temperature and precipitation)

→ How can we most effectively explore this data?

[1] <https://dev.meteostat.net/>

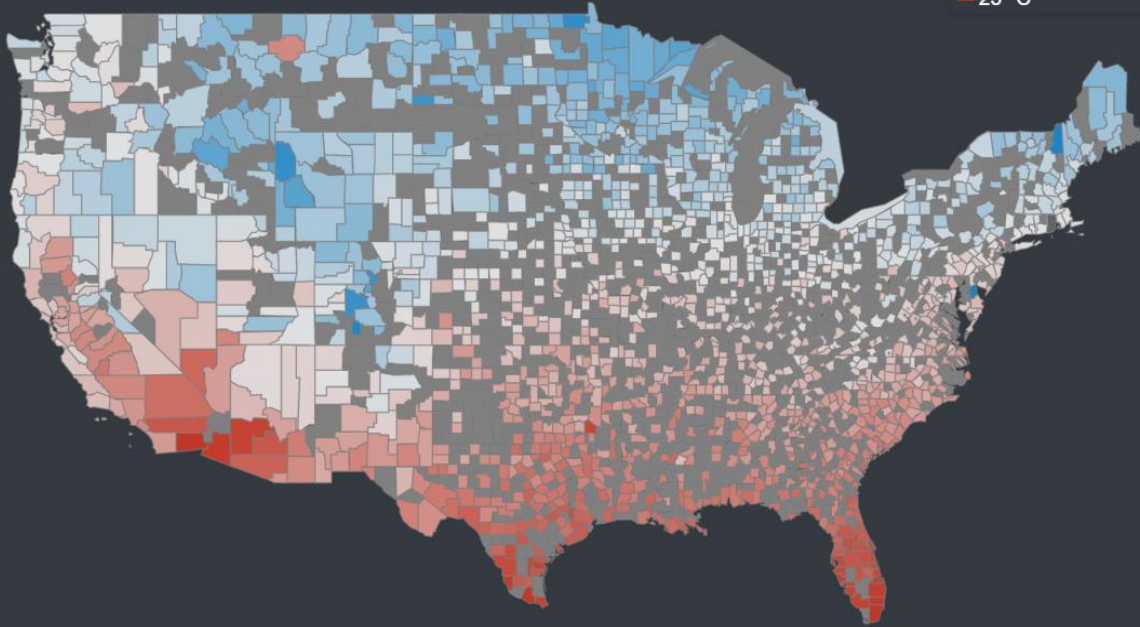

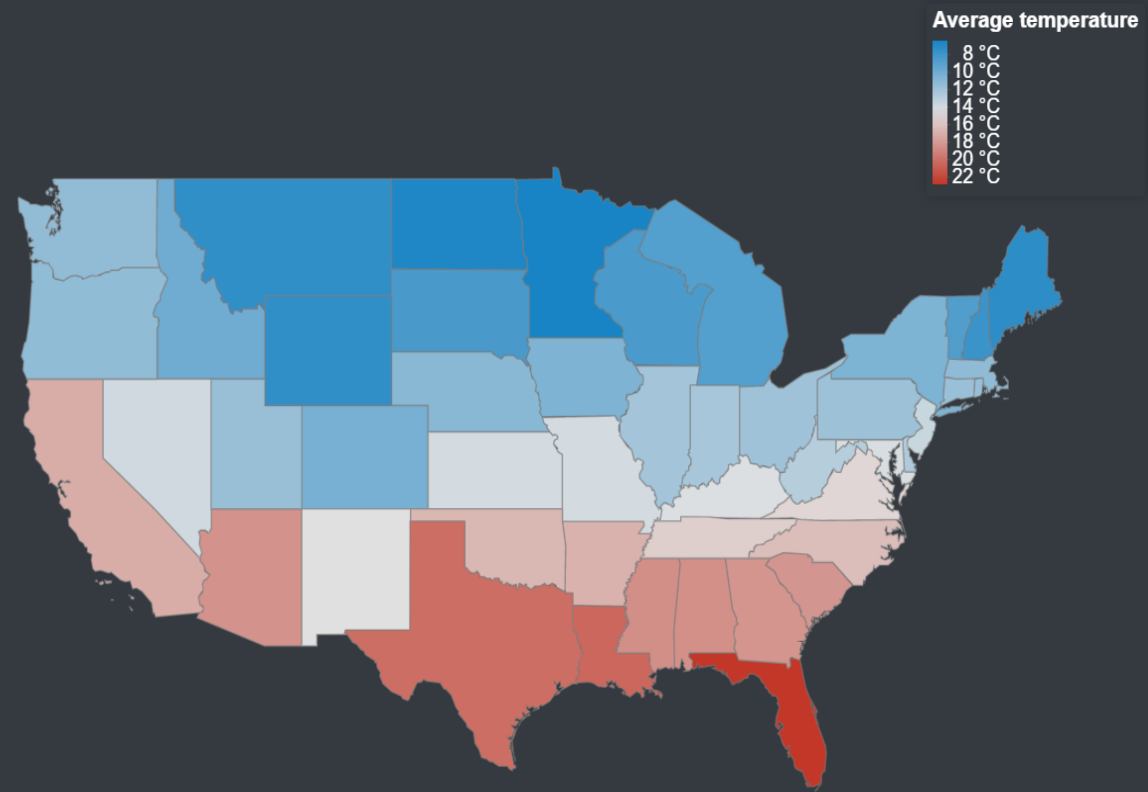

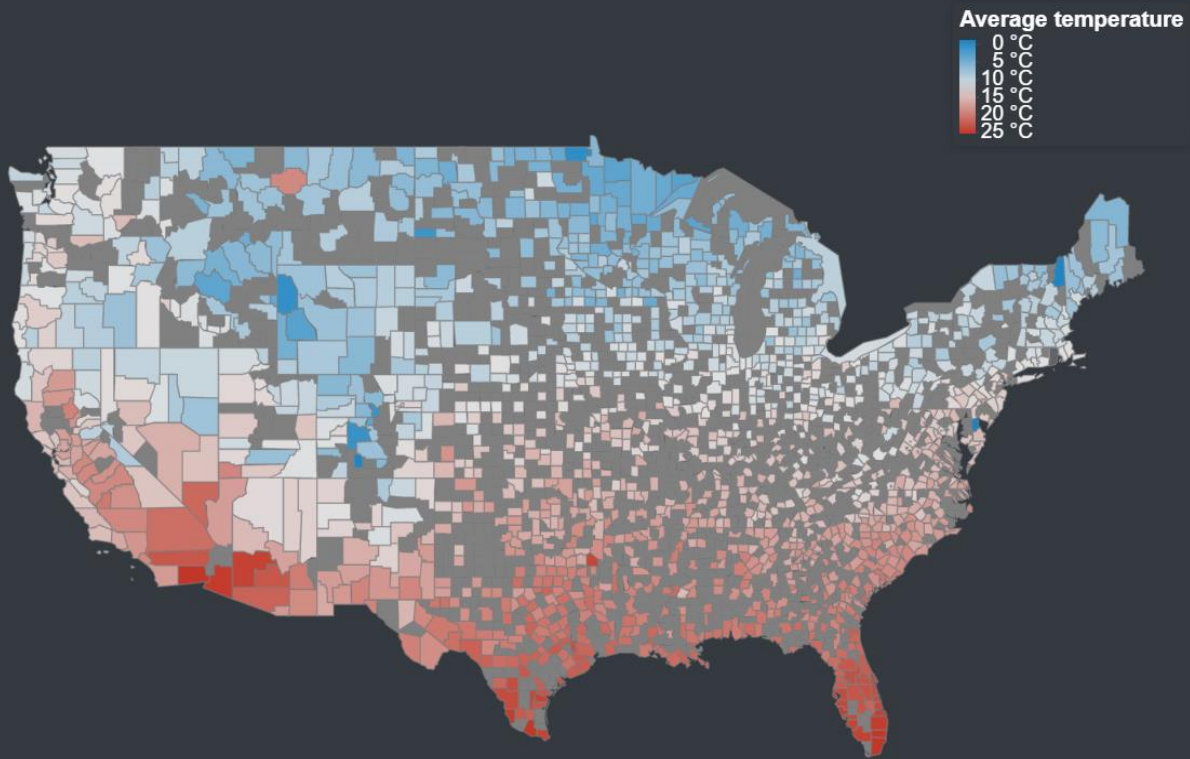

→ How can we "zoom in"?

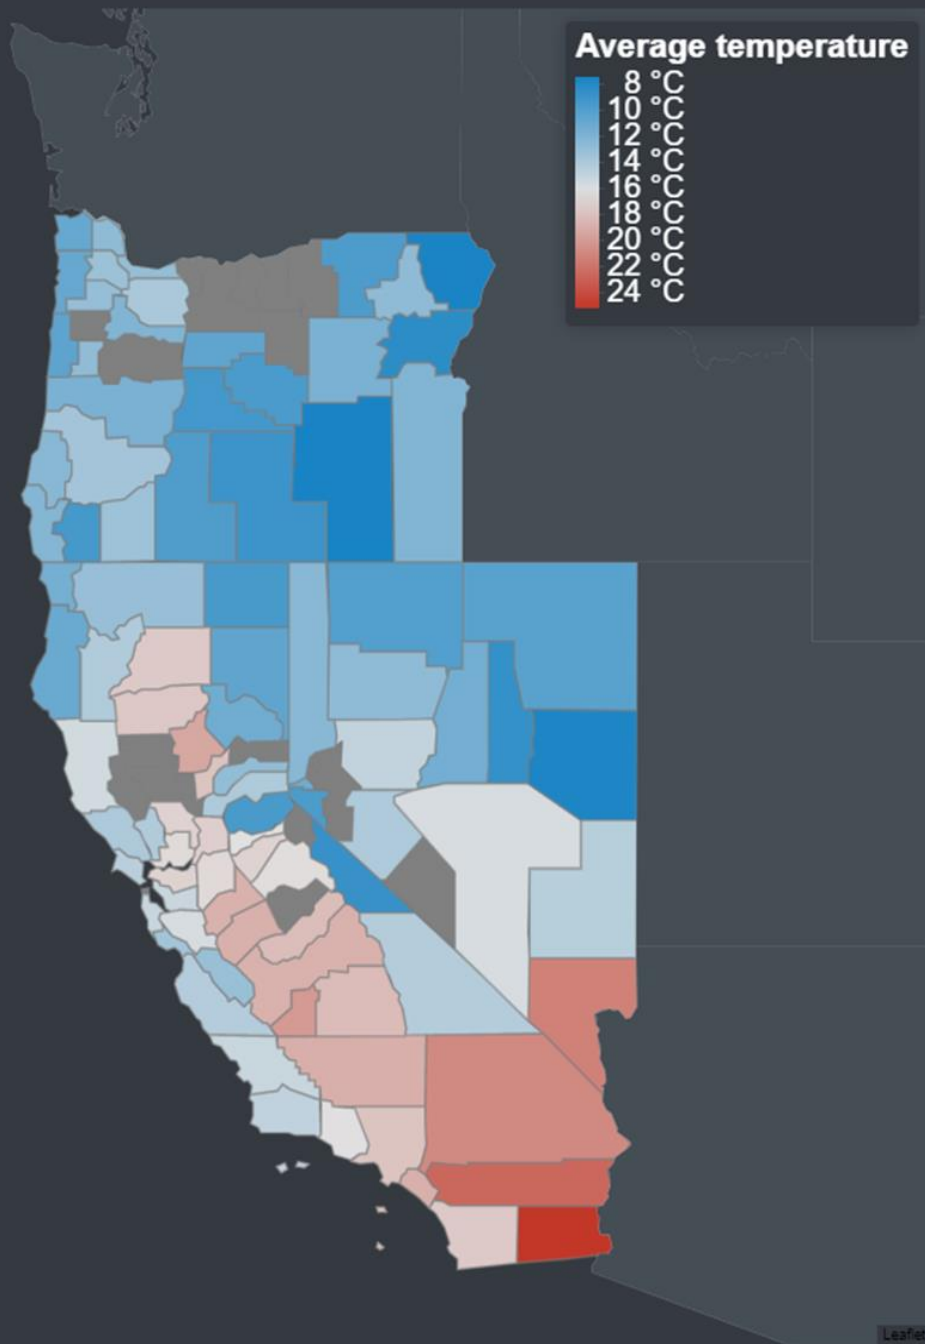

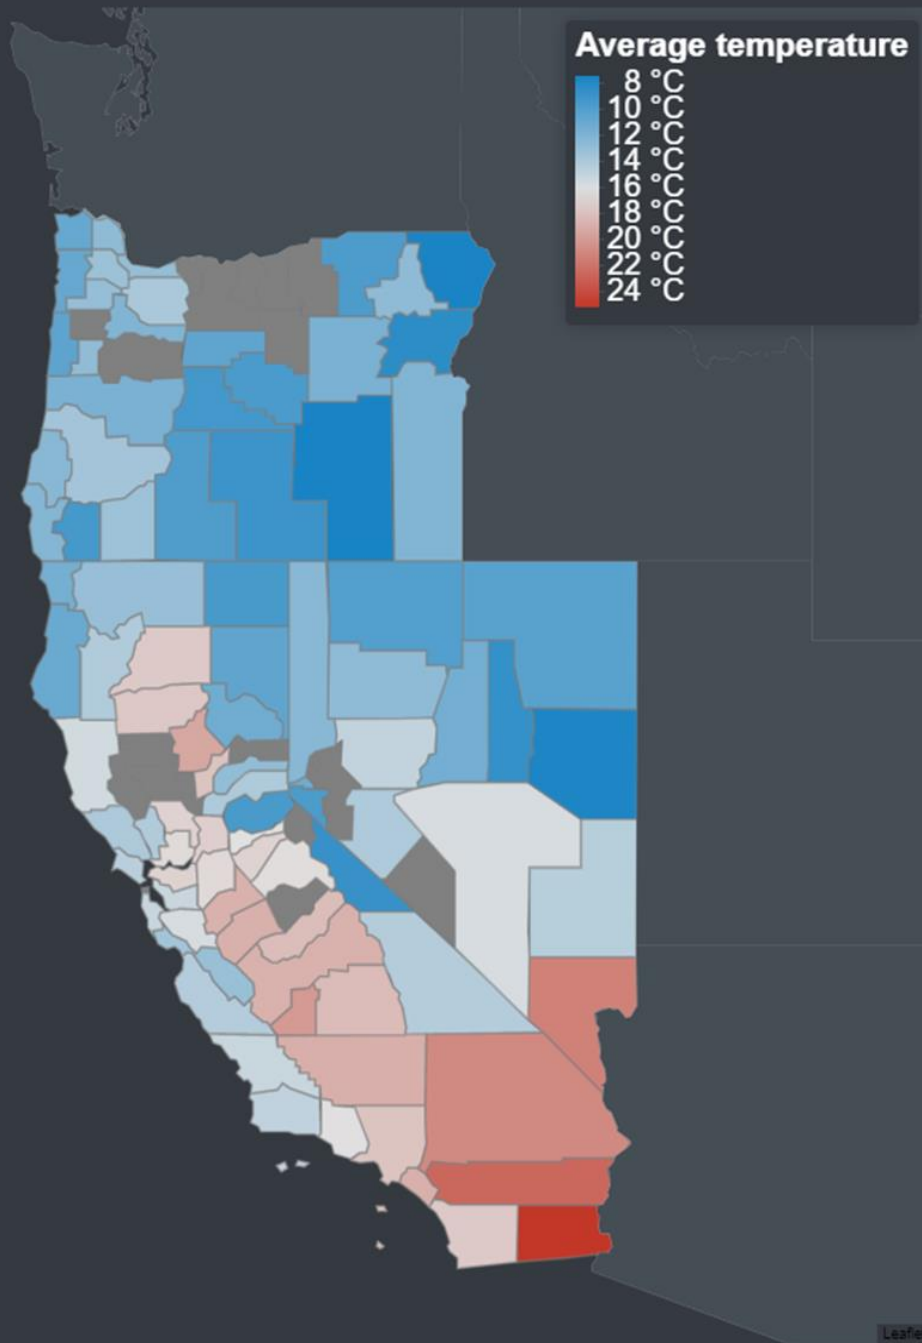

→ Drill down!

Average temperature

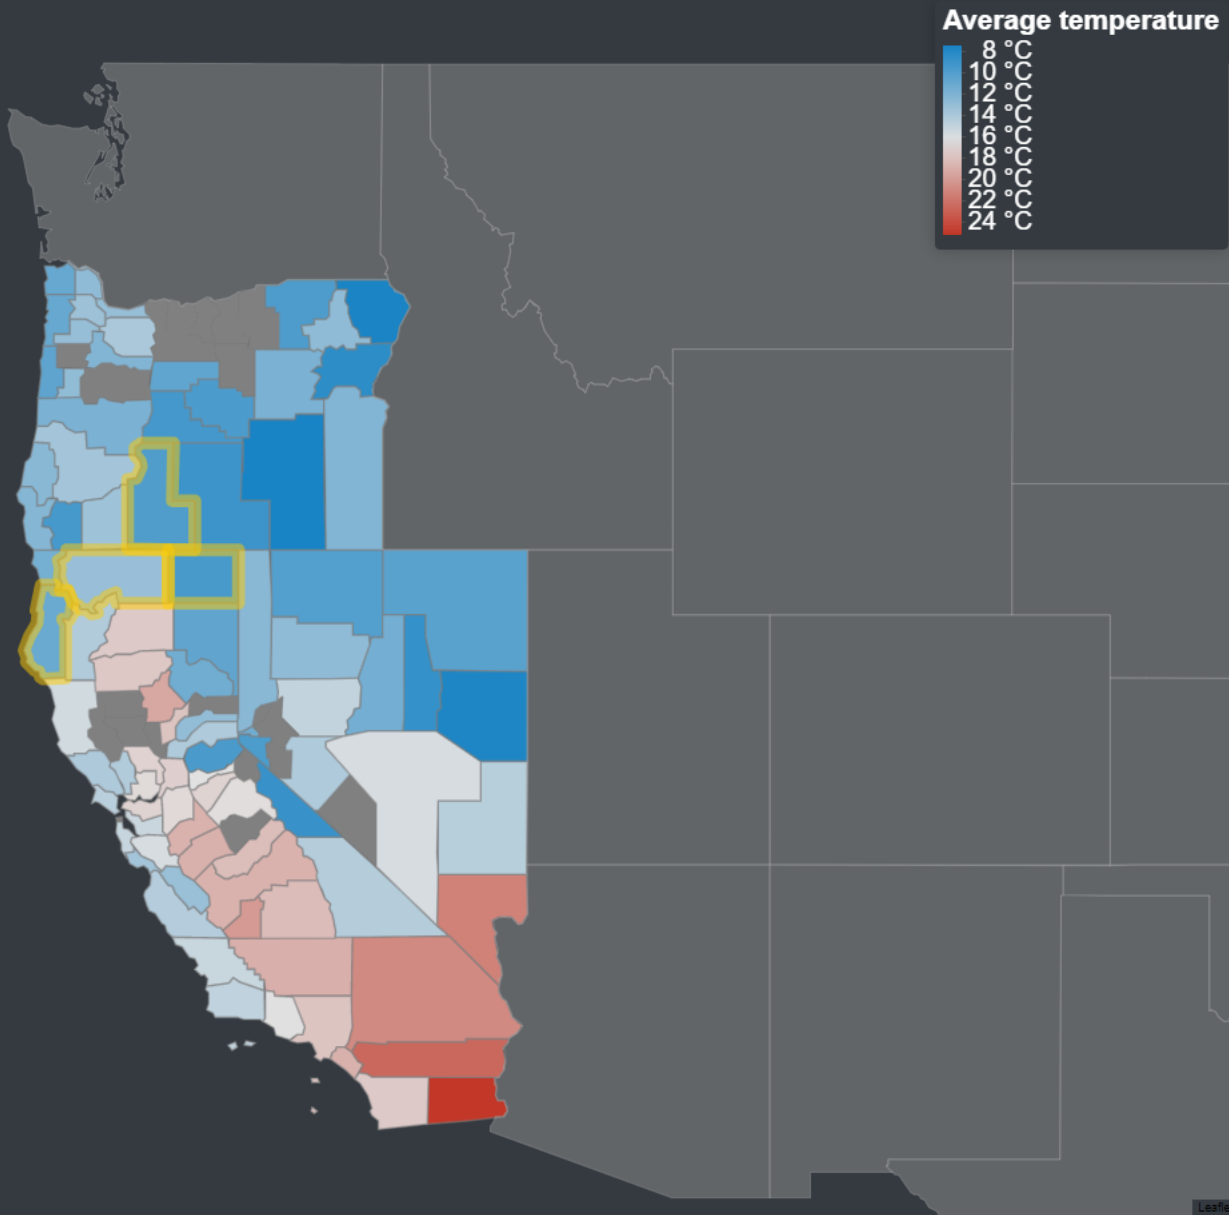

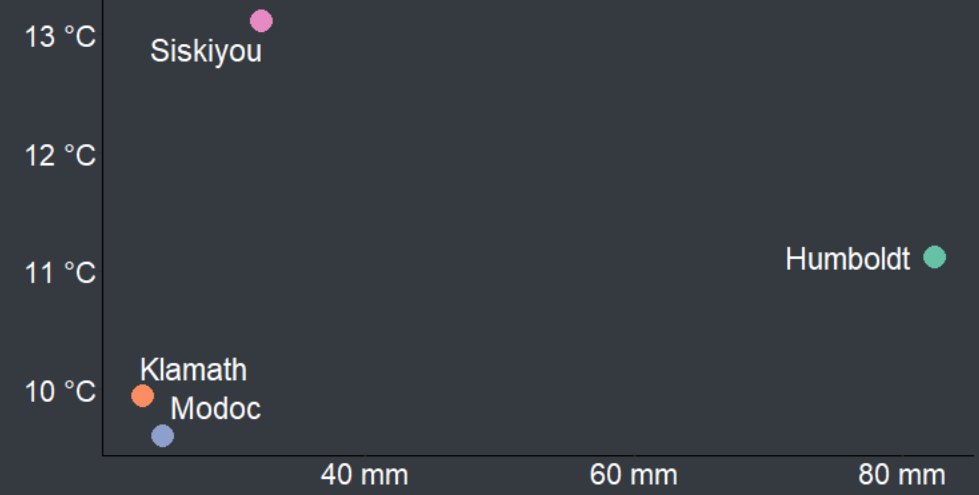

→ How can we visualize multiple variables simultaneously?

+

-

Average temperature [°C] and monthly precipitation [mm]

Development of the average temperature [°C]

leafdown package

- ✓ Adds drilldown functionality to leaflet choropleths maps in Shiny
- ✓ Allows the selection of regions/shapes
- ✓ Enables communication of the map with other Shiny elements (e.g., graphs)
- ✓ Easy to use and well-integrated into the syntax of the leaflet package
